Forecast for Tuesday 28 Jun 2022

Weather: Persistent heavy rain throughout much of the day on Tuesday driven by strong southerly winds, summit gales. By mid afternoon the rain beginning to ease and cloud breaking a little with some drier conditions for late afternoon. There may still be a few showers later in the evening.

Chance of cloud-free hill tops above 700m: 10%, very little chance of cloud free tops.

Low cloud and visibility: Extensive low cloud will be associated with the rainband and everywhere exposed to the southerly will have low cloud layers from 300m. Cloud will become more scattered above 5-600m from mid afternoon. Similarly with visibility, it will be very poor for most of the day but becoming moderate or good by later in the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A very windy day with gales on the summits. Some localised flooding in the heavy rain is possible with watercourses filling up quickly.

Forecast for Wednesday 29 Jun 2022

Weather: A dry start to the day and some brightness breaking through, however some lingering mist and low cloud is likely. Some showers developing but also a lot of bright and sunny weather.

Maximum wind: Southerly 10-15mph.

Chance of cloud-free hill tops above 700m: 80%, scattered low cloud in the morning and then patchy cloud in association with showers.

Low cloud and visibility: Scattered cloud above 500m in the morning and then patchy cloud lowering to 600m in any showers. General visibility will be good by reducing in any showers.

Temperature: **Valleys:** Plus 12 rising to 17 Celsius.
At 700m: Plus 5 rising to 10 Celsius.
Freezing level: Above all summits.
